

Dear President Obama,

I've pledged to reduce my carbon footprint by:

When you go to Copenhagen this December to negotiate a climate treaty, I urge you to pledge to **dramatically** reduce the greenhouse gas emissions of the United States. Lead the world by redirecting our economy from carbon fuels to green energy and green jobs.

With atmospheric concentrations of carbon dioxide above 350 ppm, the ecosystems of the earth - on which we depend for life - are imperilled. We are now at 390 PPM. Our earth is in crisis.

Listen to our voices. Turn away from the corporate special interests and serve the life and ecosystems of our planet.

Sincerely,

Dear President Obama,

I've pledged to reduce my carbon footprint by:
